Assignment 0927 Feedback

Lisa Rosenbaum

4d — Not much to say here—you did it! (+)

4e — Yay version control! Good that you have that running now. Don't forget to commit your prior work here also, with the appropriate file/folder organization and names.

For this particular assignment, little is expected here regarding commit frequency so no problem there; your commit messages are sufficiently descriptive also. (+)

4f — Submitted on time. (+)
